

1. Business Account Management

Company Onboarding

- Business KYC
- PAN verification
- Multi-branch setup (Future)
- Corporate agreements

Multi-user Access

- Admin account
- Operations manager
- Dispatcher
- Role-based permissions

Organization Hierarchy (Future)

- Head office
 - Regional branches
 - Warehouse mapping
 - Department-level access
-

2. Order & Shipment Management

Bulk Shipment Creation

- Create multiple orders together
- CSV/Excel upload
- API-based order import

Recurring Deliveries (Future)

- Daily milk-run routes
- Scheduled pickups
- Subscription logistics

Multi-stop Route Planning

- One vehicle → multiple deliveries
- Route sequencing
- Cluster-based delivery planning

Shipment Types

- Hyperlocal delivery
 - Intercity transport
-

3. Fleet Management

Dedicated Fleet

- Dedicated drivers
- Dedicated vehicles
- Fixed monthly contracts
- Freelancers

Marketplace Fleet

- On-demand driver marketplace
- Dynamic vehicle allocation

Vehicle Types

- Bike
- Van
- EV fleet

Fleet Tracking

- Real-time GPS tracking
 - Vehicle health monitoring (Future)
 - Trip status monitoring
-

4. Smart Dispatch Engine

Auto Assignment (Future)

- Nearest vehicle allocation
- Capacity-based assignment
- Vehicle-type matching

AI-based Dispatch (Future)

- Traffic-aware dispatch
- Load optimization
- Driver performance scoring

Manual Override

- Dispatcher manual assignment
 - Reassign driver/vehicle
 - Emergency rerouting (Future)
-

5. Warehouse & Hub Management

Warehouse Integration

- Inventory sync
- Dock scheduling
- Pickup queue management

Hub Operations

- Sorting center management
- Bagging/scanning
- Shipment consolidation

Scan & Track

- QR code scanning
 - Barcode scanning
 - Shipment lifecycle tracking
-

6. Route Optimization (Future)

Dynamic Route Planning

- AI route optimization
- Traffic-aware routing
- Fuel-efficient routing

Delivery Constraints

- Time-slot deliveries
- Priority shipments
- Vehicle restrictions

Geofencing

- Auto check-in/check-out
 - Arrival/departure triggers
-

7. Live Operations Dashboard

Real-time Monitoring

- Active trips
- Delayed shipments
- Unassigned orders
- Driver status

Operations KPIs

- On-time delivery %
- Fleet utilization
- Delivery success rate
- Cost per shipment

Control Tower View

- City-wide visibility
- Hub-level monitoring

- Escalation alerts
-

8. Pricing & Billing Engine

Pricing Models

- Distance-based pricing
- Weight-based pricing

Dynamic Pricing

- Peak-hour pricing
- Surge management
- Demand-based pricing

Enterprise Billing

- Monthly invoicing
 - Credit limits
 - Wallet system
-

9. Driver Partner Management

Driver Onboarding

- KYC verification
- License verification
- Vehicle document verification

Driver Wallet

- Earnings dashboard
- Incentives
- Daily settlements

Driver Performance

- Acceptance rate
 - Delivery success rate
 - Ratings & feedback
-

10. Reverse Auction Module (Future)

Very valuable for enterprise logistics.

Flow

1. Business posts shipment
2. Multiple fleet partners bid
3. Lowest/optimal bid selected
4. Shipment assigned

Benefits

- Cost optimization
 - Better fleet utilization
 - Competitive pricing
-

12. Analytics & Reports

Business Reports

- Daily shipment reports
- Revenue reports
- Delayed shipment analysis

Fleet Analytics

- Idle time
- Fuel efficiency
- Vehicle utilization

Customer Analytics

- Repeat customers

- SLA performance
 - Region-wise demand
-

13. Security & Compliance

Security

- OTP verification
- Secure login
- Role-based access

Proof of Delivery

- OTP POD
 - Signature capture
 - Photo proof
-

14. Customer Communication

Notifications

- SMS
 - Email
 - Push notifications
-

15. Enterprise SLA Features (Future)

SLA Management

- Delivery timelines
- Penalty rules
- Priority handling

Escalation Management

- Delay escalation
- Support ticketing
